

EXPERIMENT 11:

Illustrate the concept of multithreading using a C program.

```
1 #include <stdio.h>
2 #include <pthread.h>
3
4 void* threadFunction(void* arg) {
5     char* message = (char*)arg;
6     printf("%s\n", message);
7     return NULL;
8 }
9
10 int main() {
11     pthread_t thread1, thread2;
12     char* message1 = "Hello from Thread 1!";
13     char* message2 = "Hello from Thread 2!";
14
15     pthread_create(&thread1, NULL, threadFunction, (void*)message1);
16     pthread_create(&thread2, NULL, threadFunction, (void*)message2);
17
18     pthread_join(thread1, NULL);
19     pthread_join(thread2, NULL);
20
21     return 0;
22 }
```

Language: C

input

Hello from Thread 2!
Hello from Thread 1!

...Program finished with exit code 0
Press ENTER to exit console.
