

CSA0404 – OPERATING SYSTEMS – LAB PROGRAMS

EXPERIMENT 16

Question: Develop a C program for implementing random access file for processing the employee details.

Program:

```
1 #include <stdio.h>
2 #include <stdlib.h>
3
4 struct Employee {
5     int empId;
6     char empName[50];
7     float empSalary;
8 };
9
10 int main() {
11     FILE *filePtr;
12     struct Employee emp;
13
14     filePtr = fopen("employee.dat", "rb+");
15     if (filePtr == NULL) {
16         filePtr = fopen("employee.dat", "wb+");
17         if (filePtr == NULL) {
18             printf("Error creating the file.\n");
19             return 1;
20         }
21     }
22
23     int choice;
24     do {
25         printf("\nEmployee Database Menu:\n");
26         printf("1. Add Employee\n");
27         printf("2. Display Employee Details\n");
28         printf("3. Update Employee Details\n");
29         printf("4. Exit\n");
```

```
Employee Database Menu:
1. Add Employee
2. Display Employee Details
3. Update Employee Details
4. Exit
Enter your choice: 1
Enter Employee ID: 1001
Enter Employee Name: Naveen
Enter Employee Salary: 50000
Employee details added successfully.

Employee Database Menu:
1. Add Employee
2. Display Employee Details
3. Update Employee Details
4. Exit
Enter your choice: 2
Enter Employee ID to display: 1001
Employee ID: 1001
Employee Name: Naveen
Employee Salary: 50000.00

Employee Database Menu:
1. Add Employee
2. Display Employee Details
3. Update Employee Details
4. Exit
Enter your choice: 4

...Program finished with exit code 0
Press ENTER to exit console.
```
